RE: **UPDATED** information concerning the Free Chlorine Burn for the Englewood Water District

The Englewood Water District's Free Chlorine Burn which began February 5, 2018 has **ended**. The standard chemicals used for disinfection are being reintroduced into the system and water production will return to normal operating conditions over the next 30 days. Customers may notice open fire hydrants throughout the service area during this period as additional flushing of the system is necessary.

During normal business hours residents may call Water Operations Manager Tim Garland at 941-474-3217 with any questions concerning this process. After regular business hours, please call 941-474-3217 and call-out personnel will address your concerns.

The Englewood Water District appreciates the patience and understanding of its residents as it works to further improve the quality of the water for all customers.
